

Looking Ahead: Second-Generation Long-Acting Injectable Antipsychotic Medications for Schizophrenia

Continuing Pharmacy Education Activity

When March 31, 2020 @ 12:00 PM

Where Novant Health Systems, Manassas VA, Pharmacy Conference Room

Itinerary See following page for time and remote meeting link

Educational Goals Help pharmacists maintain and enhance professional competencies to ensure optimal medication therapy outcomes and patient safety from the use of long-acting injectable antipsychotics.

Learning Objectives At the end of this activity, the pharmacist will be able to:

1. Summarize the evidence available for the use of second-generation long-acting injectable antipsychotic medications related to schizophrenia
2. Analyze the risks and benefits of second-generation long-acting injectable antipsychotic medications for the management of schizophrenia
3. Evaluate guideline recommendations for using second-generation long-acting injectable antipsychotic medications in schizophrenia
