

Direct Oral Anticoagulant (DOAC) dosing in obesity: A closer look at the bigger picture

Continuing Pharmacy Education Activity

When June 1, 2022 5:30PM - 6:30PM

Where Webinar/Zoom link: <https://zoom.us/j/8461352508>

Itinerary See following page

Educational Goals This CE will provide pharmacists with knowledge on ensuring optimal medication therapy outcomes and patient safety for obese patients requiring anticoagulation for venous thromboembolism or atrial fibrillation; Satisfying educational requirements for pharmacist re-licensure

Learning Objectives At the end of this activity, the pharmacist will be able to:

- Review the literature for the use of direct oral anticoagulants (DOACs) in obese patients with venous thromboembolism (VTE) and atrial fibrillation (AF)
- Recommend appropriate agents for the treatment of VTE and stroke prophylaxis in AF for obese patients
- Identify current guideline recommendations and updates
- Distinguish inappropriate use of anti-FXa monitoring

Faculty Matthew Brooks, PharmD. E-mail: mbrooks6@valleyhealthlink.com
PGY-1 Pharmacy Practice Resident

CPE Information **Activity Type:** Knowledge **Cost:** 0
Credit: 1 contact hour (0.1 CEU) **UAN:** 0101-0000-22-005-L01-P
Release Date: June 1, 2022 **Expire Date:** June 1, 2025

Target Audience This activity is for Pharmacists

Credit Criteria To receive credit the following items must be completed

- Register for the event through supharmacy.learningexpressce.com
