

A Review of Status Epilepticus

Continuing Pharmacy Education Activity

When Home-study

Itinerary See following page

Educational Goals This CE will provide pharmacists with a discussion of the stages of Status Epilepticus (SE) treatment; Review the York Hospital formulary guideline of antiepileptic drugs (AEDs) used for each stage of SE treatment and review York Hospital formulary guideline recommendations of dosing and routes of administration and key safety considerations of AEDs.

Learning Objectives At the end of this activity, the pharmacist will be able to:

- Discuss treatment guideline recommendations for status epilepticus and recommended antiepileptic drugs (AEDs) and the York Hospital (YH) acute seizure order set
- Review York Hospital formulary antiepileptic drugs as detailed in the York Hospital acute seizure order set
- Recall antiepileptic drugs dosing, preferred routes of administration per the status epilepticus guidelines and correlate with York Hospital formulary
- Identify key safety considerations of antiepileptic drugs used in the management of status epilepticus

Faculty Joan Kariuki, PharmD.
